Introduction

This document can be used to configure NOD32 to allow the GTS Pro to run on your computer. Use this document if you get the following error message: “The G.T.S. Application was unable to establish a Secure Connection to the Fx Solutions Data Center.

Client Procedures

1. Double click on the NOD32 icon on the bottom right side of the screen. If you do not see the icon, click on the Start button and navigate through Programs and locate the NOD32 folder.
2. Click on the AMON icon. Select Setup.
3. Select the Exclusion tab.
4. Next, click on the Add button; then add C:\Program Files\fxsolutions\
5. Select OK
6. Next, double click on the IMON icon. Select Setup.
7. Click the Miscellaneous tab.
8. Select Edit on the Exclusion section.
9. Add the following files one at a time:

C:\Program Files\fxsolutions\fxsgtst.exe
C:\Program Files\fxsolutions\fxsgtstum.exe
10. Click OK. Click OK on the next screen as well.
11. Restart your computer after you complete this procedure.
11. Log on to the Fx Solutions GTS Pro.
