

FX Solutions Introduces GTS Mobile Forex Trading Platform for Fast, Easy Trading Access

Saddle River, New Jersey, June 3, 2008 – FX Solutions (www.fx solutions.com), a technology-driven online foreign exchange broker, today introduced GTS Mobile (www.fx solutions.com/trading/gts-mobile.asp) to give forex traders anytime, anywhere access* to their [Global Trading System](#) (GTS) accounts. As with all other GTS platforms, GTS Mobile offers universal account access – allowing users to place trades, access account information and monitor positions opened via any other GTS platform.

“Our customers always want to be able to place a trade when the conditions are right,” said Tom Plaut, Co-CEO at FX Solutions. “GTS Mobile gives customers who are on the road, or those who rely on their mobile devices heavily, a fast and easy way to place an order, whether it is to enter, close or hedge a position.”

As with the recently launched [GTS Web](#) online platform, all trades made through GTS Mobile are reflected in the user’s main GTS trading account in real-time. Further, GTS Mobile users enjoy the same 99.45% automated execution of forex orders** they experience through FX Solutions’ other GTS platforms.

Free to all FX Solutions practice and live account holders, GTS Mobile has a rich feature list, with many GTS Pro and GTS Web capabilities optimized for GTS Mobile, offering the ability to:

- Access accounts via more than 1,200 devices, including Windows Mobile, BlackBerry, Palm and Java-based platforms.
- Enter market orders
- View real-time streaming quotes and news
- Login with single username and password for all four GTS platforms
- View open positions
- Create and modify entry orders, stops and limits
- Generate pending order alerts
- Show/hide currency pairs to reduce clutter
- Use forex calculator to see P/L impact of pip moves

“Just as with GTS Web, FX Solutions is committed to offering access to the world’s largest financial market anytime and anywhere,” said Plaut. “Many of our customers live in locations where the reliance on mobile devices is high, and cell phones and PDAs are often used as the primary connection to the Internet. In the US alone, it is estimated that over 9 million mobile device users downloaded applications in 2007.”

In February 2008, FX Solutions merged with City Index Group, a London-based provider of retail derivative trading services, including CFDs, forex and spread betting.

About FX Solutions

FX Solutions is a leading US-based online foreign exchange broker serving both retail and institutional customers. The Company provides IBs and White Label Partners FX trading and risk management in over 100 countries through its Global Trading Systems (GTS) platform. Regulated by the CFTC and NFA, FX Solutions’ custom-engineered suite of applications includes one-click trading, automated execution of orders, a proprietary price

feed and competitive fixed-spread pricing - resulting in consistently low executable spreads. FX Solutions has websites and complete customer support in four languages.

FX Solutions' Global Trading System platform, known as GTS, was built to be scalable and flexible, serving the needs of retail clients and institutional partners. The GTS platform provides for over 99% automated execution of all orders** as well as a suite of professional trading features and tools. Recently, FX Solutions announced the launch of two new products: GTS Web, a web-based platform and FX AccuCharts 7.0, a charting package that has over 150 indicators and allows for trading from the charts.
